DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 through 10, drawn to a structure comprising an inflatable member attached to the outer periphery of a base platform member, classified in class 5, subclass 420.
 - II. Claims 11 through 26, drawn to a structure comprising a protective member sealing inner, inflatable panels from a child, classified in class 5, subclass 420.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a cargo container. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Frank R. Occhiuti on 16 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3671

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
